I am a qualified psychologist and have worked in both government and private business sectors. I currently serve the community as a J.P. and remain committed to be an accountable and approachable member of the community. I support projects and events that benefit residential, business, and tourism needs as well as favour initiatives that promote economic growth within the region. If elected, I will endeavour to ensure the City's **finances/rates remain responsible and well governed**; continue to deliver the infrastructure needs of the City's growing population; ensure **sustainable growth** with respect to natural environments, support **disability access and inclusion** initiatives, and address issues that concern those residing in the East Ward.

After all, Mandurah provides a range of community resources that connect people of all ages and diversity to groups and services in the region. With my experience and knowledge of Local Government processes, I would work to maintain that connection.
