

### **Additional Information**

The projects I will champion if elected Mayor are.

A New Civic Centre, incorporating a new museum, library, art gallery and grand ballroom for hosting conference event dinners.

Currently we are turning away large conferences who are trying to use our facilities, but we don't have capacity to sit 250+ people for dinner.

This is real income generating tourism, we create a space where the best and brightest want to come and share their ideas.

This provides a melting pot where are youth and wise elders can share knowledge and energy, hopefully leading to entrepreneurship within our city.

A New CBD, this will require collaboration with multiple stakeholders to incentivise businesses to move their offices to Mandurah. First we gain the commitment of an anchor tenant business interested in taking centre stage in Mandurah's CBD, then we assist developers and landowners to achieve the vision for a proper Central Business District! People working in the city centre will eat at the restaurants and provide a year round economic boost. Tourism alone cannot support our economy.

Coastal protection. Using our world leading West Australian coastal engineers, we design structures to protect our coast and create certainty for our residents. Lets take on coastal erosion and become world leaders in creating coastal structures that not only protect the coastline but provide habitat and also facilitate recreation.

Nature Trails, Lets beautify our city with tall trees and native wildflowers. creating nature corridors through the city so residents can walk or cycle surrounded by nature.

Power Points for food vans. Every beach or estuary park with a clean public toilet should have power points for coffee vans and food trucks. These are exactly the type of small businesses we should support. Reduce noise and facilitate enjoyment of our suburban parks. A simple license fee for use. We can encourage vibrant spaces in our communities.

Tackle Homelessness. I will get it done.
