

### **Additional Information**

I have been a resident of Mandurah for over 30 years. I owned a profitable small business in Nedlands . When that was sold I was able to retire to Mandurah with my family who became commuters to the city. With retirement I became interested in community welfare, particularly youth welfare. I became a volunteer for YouthCARE which supports chaplains in local government schools. I also founded and continue to chair a local charity, WA Mums Cottage. I have been volunteering for 30 years and have come to know the needs of the community very well. I have always had a concern for the quality of life of the residents of Mandurah. That is why I am now nominating for the position of Mayor of Mandurah. With my small business qualifications of careful fiscal management and governance of a registered charity I believe I have a sound background for leading the city forward in improving the quality of life of its residents.

I will ensure open and transparent council that is truly consultative. A Council that has a priority to care for its people and the space where they choose to live. A council that recognises what has gone before and respects and cares for the environment. As Mayor of Mandurah I will be a team player and a strong leader for the community
