

Additional Information

I am proud to call this community my home. As resident and high school teacher, I have had the privilege of working with youth every day. I see firsthand, every day the potential of our young people and the challenges families face. I also see the hopes and opportunities that shape our town, and I believe we are at a turning point where we must plan carefully for the future while protecting the lifestyle and environment that makes this area so special. I want to ensure our council makes decisions that strengthen our community and its residents.

We are blessed to live alongside some of Australia's best beaches, waterways and parks: both marine and land. Protecting them is not just an environmental policy but a safe guard for our lifestyle and identity. I am committed to ensuring they are preserved and enhanced for generations to come.

Crime is best reduced by addressing the root causes. I will push for more community programs, facilities and opportunities to keep youth engaged and supported.

I am strongly opposed to rate increases and if elected, will hold council accountable. Ratepayers deserve transparency and honesty in every decision. I will listen, consult, and report back clearly to the community. With balanced planning, environmental protection and smart financial management, we can move forward without sacrificing what makes our town great.
