

All Kids are Welcome at the MARC

Some children find it hard to talk. Some children find it hard to understand speech. Visual supports can help lots of children to understand and be understood better. In our creche, we point to pictures on communication boards like this one, and we also use Key Word Signs, when we talk to children in our care so that we can all learn to understand each other more easily. Please let us know if your child uses any other ways of communicating so we can best look after them.
