

Dealing with dog poo at home

Responsibly manage your dog's waste to benefit the environment & your garden!

Reducing your dog's carbon paw print

- 1. Bury in the garden:** dig a hole in the garden, add poo, cover with soil & repeat. Avoid burials in one spot.
- 2. Worm farm:** create a worm farm solely for dog poo - worms can even take care of dog hair!
- 3. Compost:** check out special composting bins online or add to your existing compost bin.

IMPORTANT NOTE: DOG POO CAN CAUSE DISEASE IN HUMANS

- 1. Do not** handle dog poo with your bare hands - use a spade or wear gloves.
- 2. Do not** put dog waste compost/worm castings on or near edible vegetable, herb or food gardens.
